Invitation

We are going to organize an International Seminar on “Introduction to Artificial Intelligence and Its Application”. The program will be held through hybrid Mode on 9th April 2024 at 10:00AM to 4:00PM. You are cordially invited to join this Seminar and make it grand success.

About The Seminar

The “Introduction to Artificial Intelligence and Its Applications” seminar for an undergraduate MDC (Multi-Disciplinary Course) course would typically serve as an introductory exploration of AI concepts, providing students with an understanding of its basic principles, methodologies and applications across various domains. Below is a general outline of what such a seminar could cover:

1. Introduction to Artificial Intelligence (AI)
2. Key Concepts in AI
3. Applications of AI Across Disciplines

By the end of the seminar, students should be able to:

1. Understand the core concepts and methods of AI.
2. Identify the potential applications of AI in their specific fields.
3. Be aware of the ethical, social, and practical implications of AI technologies.
4. Gain an introduction to hands-on AI tools and models.

This seminar would not only help students understand the fundamentals of AI but also encourage them to think about how AI might shape their future careers or academic pursuits in different disciplines.
